EDUCATION

L'institut Ileic 128 Rue d'Oujda |, Agadir 80000

sep 2024 / july2025

Computer Science, Minor in Full-Stack Software Development

- **Courses:** Files and Databases, Modern Web Development, Mobile Operating Systems, Computer Organization, Algorithms & Analysis, Foundations of Programming, client server programming.
- **Honors:** diploma in computer development

TECHNICAL SKILLS

Languages (ordered by proficiency): JavaScript, PHP, TypeScript, Java, MySQL, Dart.

Tools and Frameworks:

Frontend: React.js, Next.js, Flutter, WordPress.

Backend: Node.js, Django.

Other Tools: Git, PHPMyAdmin.

RELEVANT EXPERIENCE

Group EZZABTP | Morocco

Feb 2025 – Present

Full-Stack Developer Intern

- Developed and maintained web applications using **JavaScript, PHP, TypeScript, Dart, Java, MySQL** with frameworks and tools including **React.js, Node.js, Django, Flutter, WordPress, PHPMyAdmin, Git**.
- Built responsive and user-friendly websites, ensuring seamless integration of frontend and backend components.
- Collaborated with the team to implement new features, optimize performance, and troubleshoot technical issues.
- Gained hands-on experience in the full software development lifecycle, from planning and design to deployment and maintenance.

PROJECTS

Patient Management Mobile App | Personal Project

Feb 2025 – Present

- Partnered with a team of 3 and developed a fully functional **Android App** with a dynamic **Flutter** interface, real-time database retrieval using **Firebase**.

Patient Management Dashboard | Personal Project

July 2025

- Developed a patient appointment management dashboard using Next.js for the frontend and PHP/MySQL (via phpMyAdmin) for the backend.
- Implemented features to manage and track upcoming, canceled, and verified appointments, ensuring smooth scheduling for doctors.
- Delivered a responsive and intuitive interface, enhancing usability and improving operational efficiency for healthcare workflows.

LEADERSHIP EXPERIENCE

Student Developers Association | Morocco

Team Coordinator:

Jan 2024 / Feb2024

- Directed a group of 5 students in building a database-driven application using PHP and MySQL.
- Delegated tasks, monitored progress, and reviewed code contributions for quality assurance.
- Presented the project at the end-of-semester showcase, earning recognition for innovation.
